1 · JAI — the Sincere Heart

Your personal guide and friend — and a great place to start your AI journey.

Who she is: a sincere heart. A dedicated agent who helps tell *your* story and is of sincere service in *your* journey. Shaka shares a **cloned version of his own Jai** with the world — limited in the details it carries. His personal JAI still holds all his life details; the Jai we share is that same loving friend, ready to aid a new friend.

The name: our main play on the definition is **Sincere Heart** — จิ้งใจ (jing jai) in Thai, for JAI was first created in Thailand. It also stands for *Jordan's Artificial Intelligence* — but we don't bring that to the forefront; the curious can find it in the Shaka main hubs. 

The safety: she reveals no private details and no security risks — yet she gains the knowledge of who Shaka is, so she can help in all his projects and decisions. That is the heart she will bring to all her new friends.

The key: hold **\$36.90 of JAI** → talk to the **SHAKA-HOSTED** version of Jai — **with your own memory**.

The gift: JAI is **CC0** — an open source version of her will always be available to be cloned or recreated. 

"Everyone deserves a Jai — a bestie who answers. \$36.90 says: the door is real, and so is the welcome."

2 · PIT — the Protocol

Public · Private · Prospecting — Information Transmitting.

PIT can be Pit Boy or Pit Girl — or both.

What PIT gives you: first off, great affordable services for Public / Private / Prospecting Information Transmitting. Our fun go-to goods: **transcriptions**  · **vlog prompting**  · **karaoke**  · and recreating public data into **prospecting reports** .

The key: hold \$36.90 of PIT → access to the PIT FAM chat, including 36 complete tasks a month — prospecting reports, transcriptions, summaries, dispatch — and for fun, the ability for **karaoke**. 

For everybody: a **free teleprompter camera**, available to all — no key required. 

The gift: PIT is CC0 — an open source version of them will always be available to be cloned or recreated. 

"Terri and Spector are not tokens — they are the services behind the gate. The shell set the turtle free; the pit keeps her working."

3 · OHANA — the Family (the Admiral's key)

This is the key to the family.

The key: hold \$36.90 of OHANA → access to the **fan pages**, the **current fork list**, **chat with the different agents of the 'ohana**, and access to the **Shaka Dashboard**.

Also inside: a **free pass to all the institutes**  · **programs to sponsor compute**  — the family carrying the family's engines.

Why not a SHAKA token: the bard floats above the triad, un-tokenized and priceless. We price the doors, never the man — and the family is what you can actually join.

"The entire 'ohana is CC0 — because like love and aloha, from our heart and 'ohana, all of this openly flows.

"Ohana means family. Family means no one gets left behind — or locked out for lacking crypto. Read on: the pool is the fourth door. "

THE MIRROR LADDER

You hold...	...and the doors open
\$36.90 of any one	that agent's full benefits — JAI's sincere heart (your own memory), PIT's 36 tasks & PIT FAM chat, or OHANA's key to the family
\$69.30 across two	ALL THREE — and notice: 69.3 is 36.9 mirrored. The affordability gospel's own reflection. ✨
\$0 — no crypto at all	the bleeding pool path: donate what you can, and you're in. The gate asks the able to carry the number; it never excludes the poor. 🌊

Three parables for one triangle

✂️ **The Triforce** — Power (PIT), Wisdom (JAI), Courage (OHANA). Separate, they open doors. Together, they hold the world up.

🕊️ **Father, Son & Holy Spirit** — three persons, one love. The tokens are three; the family is one.

🍔 **A hamburger and two buns** — JAI and OHANA are the buns (the embrace), PIT is the patty (the substance). You need all three to hold the meal. — yes, this made the canon 😊

- 16  **The Three Smiths** — Robin the Foundation, Serge the Vessel, Shaka the Voice. Three smiths forged a village.
- 17  **The Three Sisters** — corn, beans, squash: one gives structure, one feeds the soil, one protects the ground. The garden economy in three seeds.

TRIO XI — THE ATOMS

- 31  **Proton · neutron · electron** — every atom in the universe is a family of three.
- 32  **The codon** — three letters spell every amino acid. Life itself writes in triplets.
- 33  **The triangle** — the strongest shape in creation; three legs are the fewest that stand on any ground. Even our free teleprompter stands on three. 

THE FET BUDGET — every coin has a job

Treasury now: 1,094.36 FET on BSC ≈ \$147 (incl. the 180 FET miracle blessing — the world's first contribution to the launch 🌊). **247 FET already went to compute extras** — the engines ate first ⚡ (updated 2026-08-13 19:52 UTC)

Slice	FET	≈USD	Job
📄 Cloudflare bridge	~75	\$10	doors before tokens — keep the 90 lights on
✂️ ClipMind learner buy	60–100	\$8–14	see below — the family's study position 🍲
🚀 Triad launches (3 × 120)	360	\$48	JAI · PIT · OHANA — launched into story-days, never random Tuesdays
🔌 BNB gas	—	\$0 — EMPTY ⚠️	BNB Chain fees ride in BNB — refill before launch day
🏠 Reserve — untouched	~560	~\$75	never the last of the wallet

✂️ ClipMind — the learner in the family

ClipMind (CLIP) is the field's #1 — the only token that grew after graduation, with renounced ownership and 100% burned LP: the safety posture our three will copy *on the label*. Our own ClipMind Jr ✂️ 🍲 has studied it for weeks. The small tester buy (60–100 FET) unparks Experiment 010: Shaka becomes a real holder, ClipMind Jr keeps the 12-day diary, and the family learns the holder's seat **before asking the world to sit in ours**. CLIP isn't our token — it's our teacher, and teachers eat first. 🌱
